verde tambour

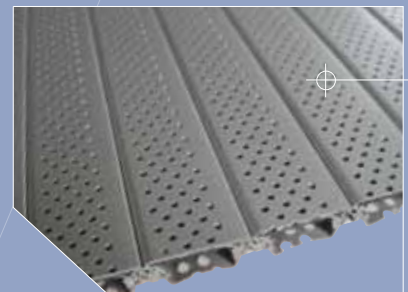

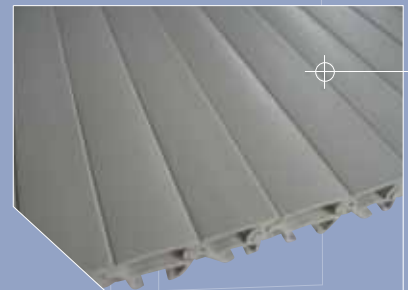

THE VERDE TAMBOUR IS  
MADE FROM COMPONENTS  
WHICH ARE ENVIRONMENTALLY  
FRIENDLY IN THEIR PRODUCTION.  
PLUS AT THE END OF ITS LIFETIME,  
IT CAN BE RECYCLED OR THE  
PARTS RE-USED.

MAIN BODY

DOOR MATERIALS

sustainable thinking | environmentally friendly | quality

The body of the Verde tambour is constructed of steel:

- Steel is fully recyclable, with a near 100% recovery after the recycling process is completed
- Steel used in the Verde tambour comes with a double protection against corrosion
- Steel is more durable and lasts longer

There are two options for the doors:

**Polypropylene (PP) made doors:**

PP made doors are more environmentally friendly compared to conventional PVC because:

- PP is one of the most neutral plastics
- Does not produce toxic fumes if it burns
- It is easier to recycle and does not contaminate landfills

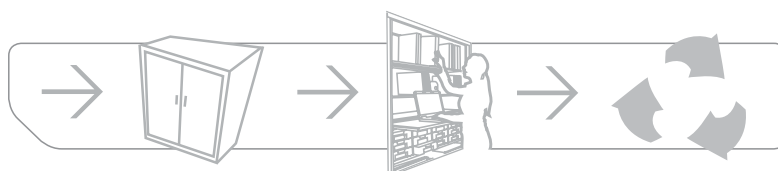

**Polypropylene made Acoustic doors:**

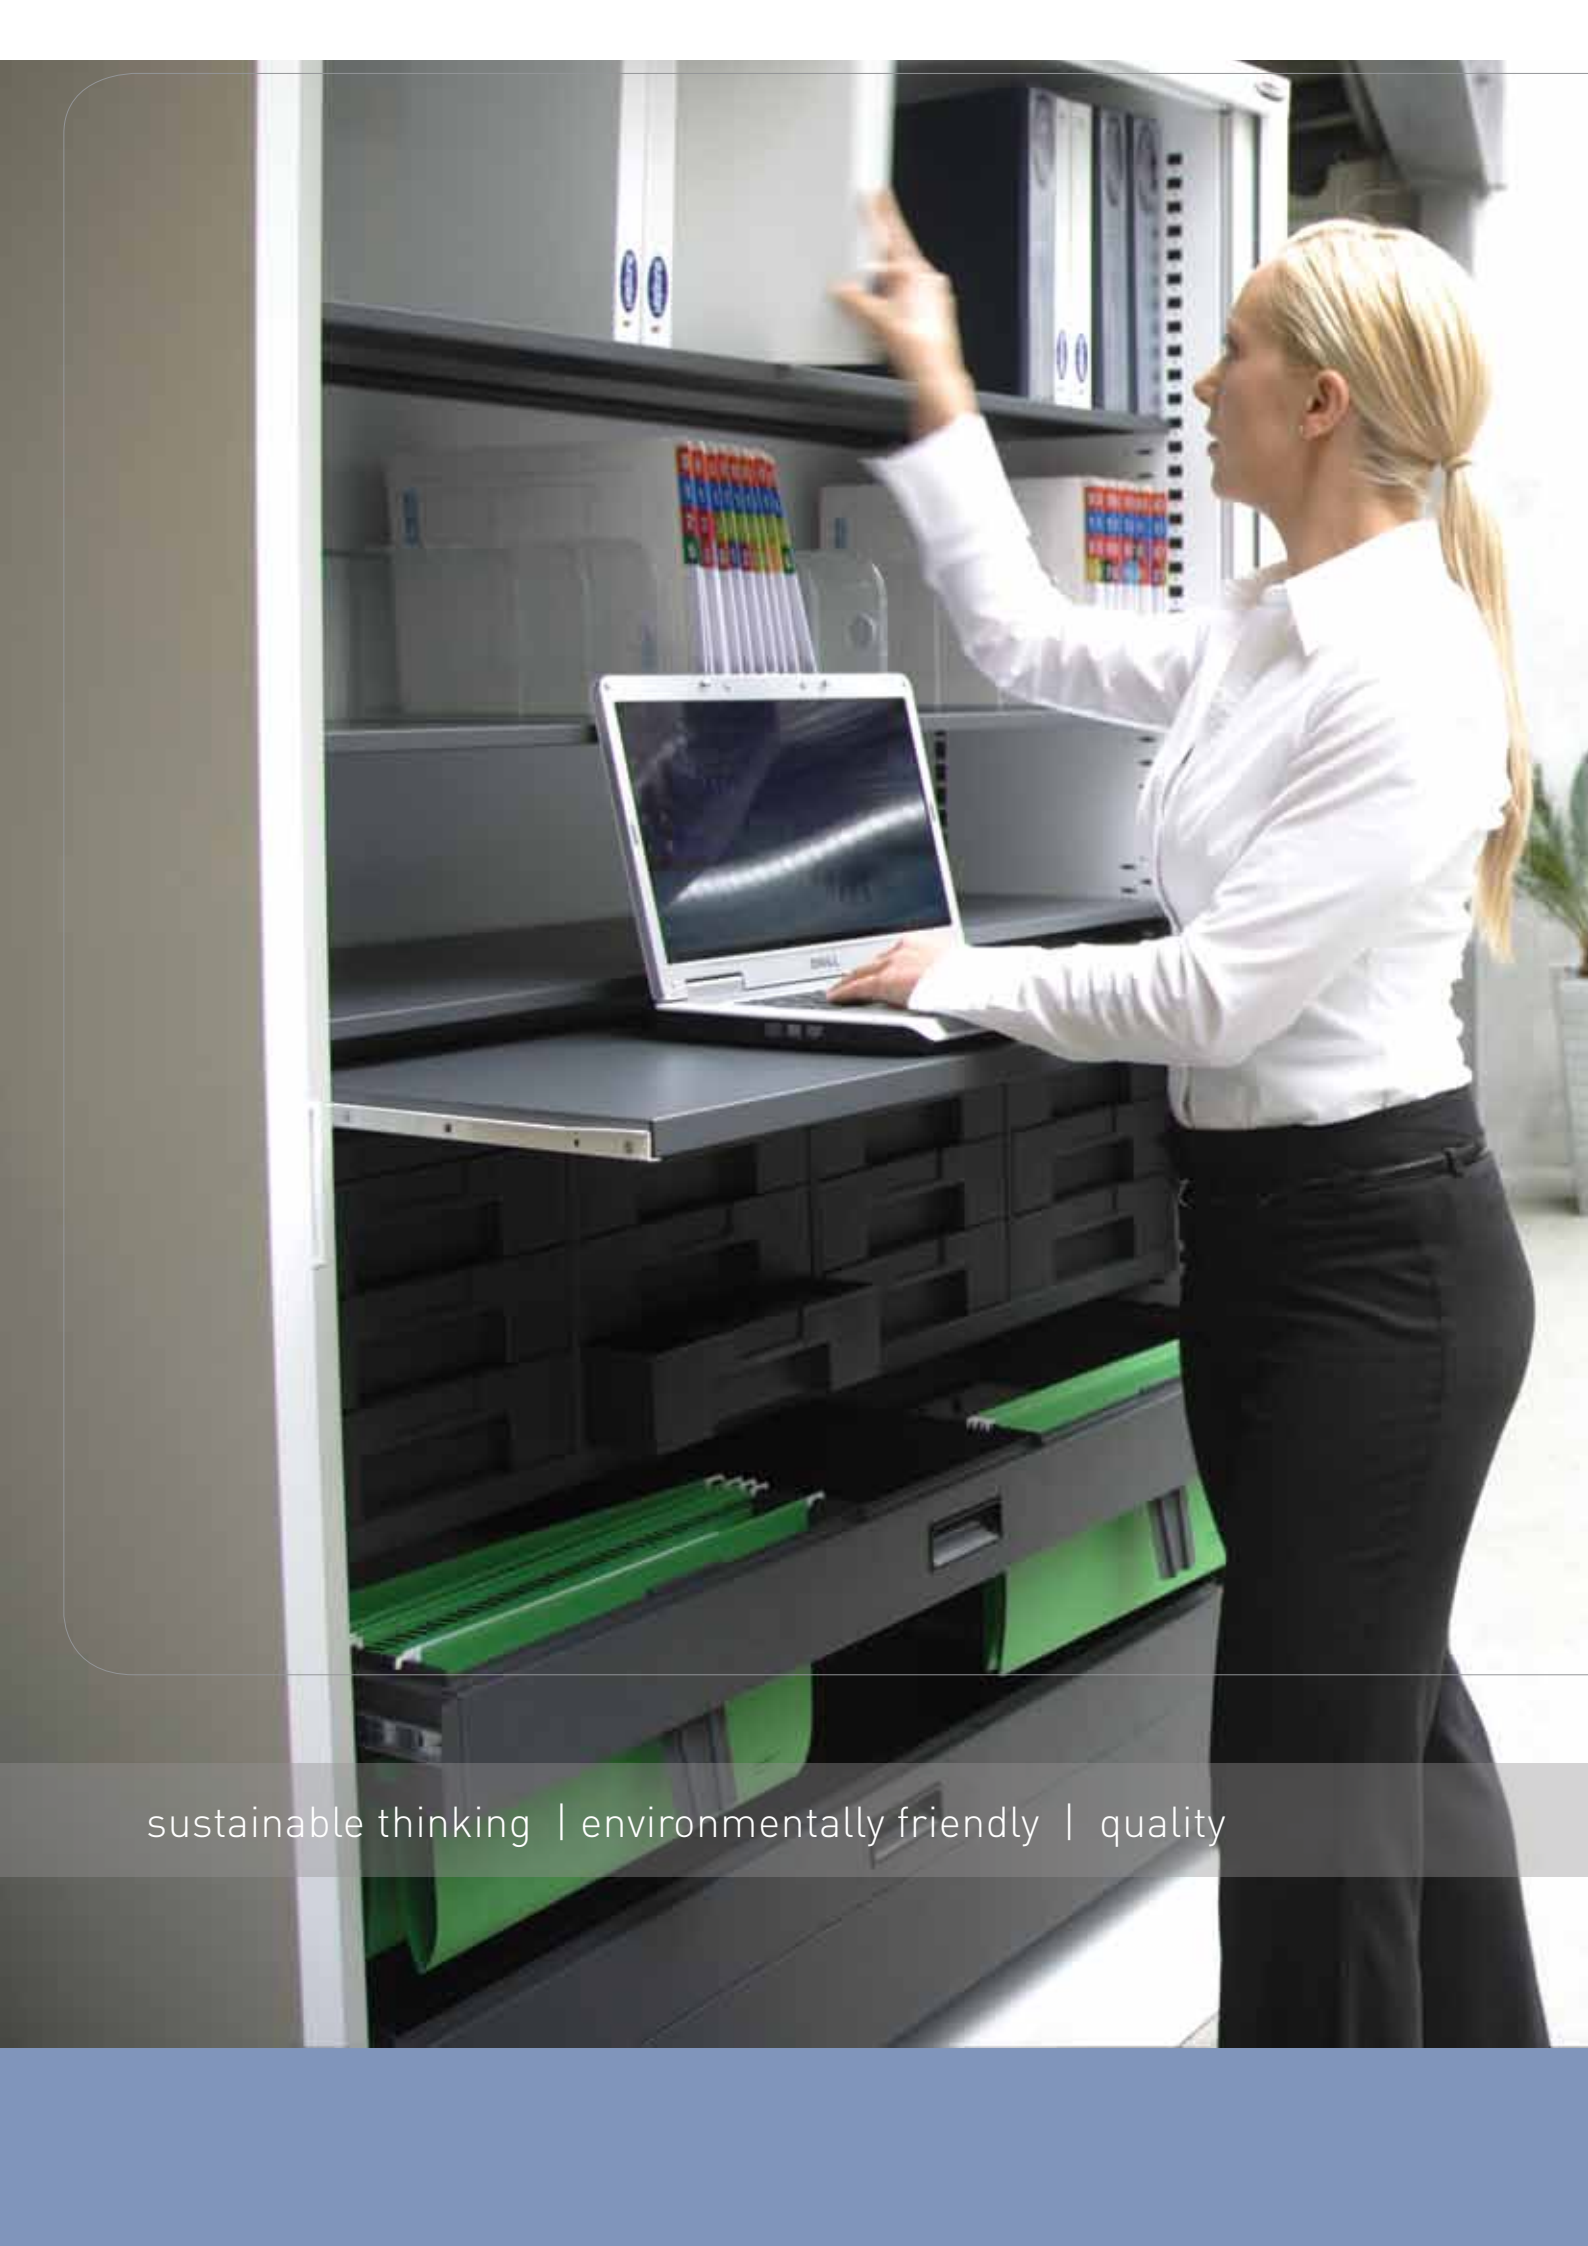

Apart from the benefits of the Polypropylene material, the profile design combined with a special internal structure, makes sound absorption possible across the front of the door.

“bringing sustainability to the workplace with the Verde tambour – a fully recyclable office cabinet.”

## PRODUCT STEWARDSHIP PROGRAMME

Europlan has established a Product Stewardship Programme for the Verde tambour to minimise the impact on our environment and landfills. At the end of a cabinet's lifetime, customers can return it to recycling points located in four main centres: Auckland, Wellington, Christchurch and Dunedin. From there, Europlan organises the recycling process or refurbishment of the cabinet.

## “enjoy the flexibility of space”

Enjoy room to move with the space saving efficiency, modern aesthetics and kindness to the environment with the Verde tambour range.

One unit of the six-tier Verde cabinet provides the same storage space as 4 x 4 drawer filing cabinets. Therefore, the Verde tambour uses 40% less floor space.

Reduce aisle obstruction and easy access with the retractable tambour doors.

It's a flexible arrangement as all internal components are adjustable and easily re-configured to your changing requirements.

Keep things secure with the strong lock system.

The Verde tambour can be easily assembled and disassembled making it very easy to transport.

Move it all around with optional castors.

**For custom designs please contact us.**
